

THE PAN-ARUBAN

The Pan-Aruban is by and for the Employees of the Pan American Petroleum Corporation, and affiliated Companies. It proposes to present the issues, not debate them; to publish news, not create it; and to make Aruba more enjoyable.

"HERE'S HOW"

Caesar crossed the Rubicon; Washington stole across the Delaware; Gertrude Ederle out-muscled the Channel; and even you took fate by the throat in out-stomaching a fretful Caribbean. The above has no related historical significance, save the unavoidable fact that from time unchronicled until the present day, the world has seen innumerable die-casters.

The need in Aruba for some news medium is apparent and real. A new civilization has swept down on a coral island, almost over night. With it has come a march of progress unparalleled even, in point of time, by the conquest of our own American frontier. The written or pictorial record of man's endeavors has always been a token of the progress of that era. So again, in Aruba, where a community has been reared to the sky-line above a coral and cactus waste, we propose to tell you what is going on within that community.

"The die is cast."

There is but one purpose for this weekly newspaper. That purpose is to make your life in Aruba more enjoyable. We believe that you will be interested in the radio news; that the story each

week of your own camp life will attract you; that you will be glad to find all official bulletins and announcements collected for your convenience; that this paper can do much to help you promote activities of general camp interest that we can be of service in obtaining answers to questions which perplex you; and finally, that we may assist in promoting that co-operation between the employees and the management which is so singularly necessary for the successful realization of our common cause. Anything which will help us to better accomplish our purpose is welcome--we want suggestions.

Anyway, that's that and Here's How

.....

"THANKS"

In another part of this issue is printed a statement from Dr. Holland. It is a source of satisfaction to have such earnest support and whole-hearted well-wishing expressed for the success of the Pan-Aruban. We take this opportunity of expressing our thanks for the supplies which the Company has granted to make possible this paper.
